CHARLESTON or LARGE WAKEFIELD

71 days. Desirable for home and market garden. Head broad heart-shaped, 8 inches broad at base, firm, commonly weighing 4 to 5 pounds. Fully a week later; heads larger and broader heart-shaped than Early Jersey Wakefield.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as Jersey Wakefield. The stem is short, and the large, round, solid head has few outer leaves. My stock of this popular variety is extra early, uniform and dependable. A round head, weighing 3 to 3½ pounds, produces headed Cabbage 70 days after plants are set out.

GOLDEN ACRE

62 to 64 days. The earliest round-headed Cabbage; especially valuable for early market and shipping. Plants very small and compact; stem short; heads uniformly round, firm, commonly 6 inches in diameter and weighing 3 pounds. This is similar to Copenhagen Market but is several days earlier and the heads are smaller. It is practically as early as Early Jersey Wakefield.

FERRY'S ROUND DUTCH

71 days. Splendid for home and market garden. Plants small and compact; stem short. Heads almost ball-shaped, commonly 7 to 8 inches in diameter and 6 inches deep, weighing 4½ to 5 pounds. Firm and of high quality. Slow to produce "seeders."

GENUINE WILT-RESISTANT FROST-PROOF PLANTS

*Ready September 1 to June 15
except where otherwise noted*

WISCONSIN ALL-SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants of standard All-Season grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities, and it is well adapted for kraut and for winter use. Makes heads in 85 days, weighing 6 to 8 pounds.

MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important midseason yellows-resistant variety for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail. Matures heads 70 days after plants are set out. Somewhat larger head than Copenhagen, but the same shape.

GEORGIA BLUE STEM COLLARD PLANTS

These are very much like Cabbage plants. They grow from 2 to 3 feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

FULWOOD'S GENUINE FROST-PROOF ONION PLANTS

Southern-grown Onion plants are no longer an experiment. Large quantities are set out every year and they are rapidly displacing sets. They will grow large, sweet Onions early, and are good keepers. They produce Onions two to three times larger than sets, and seldom run to seed. They can be set early, the same time you would put out sets or cabbage plants. Therefore, we strongly advise you to use our plants

SWEET SPANISH

The best of the very large mild varieties. One of the original Spanish types, but a better keeper because it was selected for keeping qualities. Deep amber-orange; small neck; globular.

SWEET SPANISH ONIONS

instead of sets, whether for the market or home use. Our Onion plants are grown from the very best seed, and will be found true to name. These Onion plants should be set out at the same time as cabbage plants, and you can order them for shipment at the same time.

Most Onion plant growers pull Onion plants ahead and store them several weeks before shipping. Such plants cannot produce good crops. Our plants are fresh pulled and shipped the same day and produce better crops.

YELLOW BERMUDA

This is the most widely planted of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market. It is a large producer and a real money-maker. Whether grown for marketing or for your own table, you can make no mistake in ordering this variety.

*Ready
September 1
to June 1*

CRYSTAL WAX BERMUDA ONION

CRYSTAL WAX BERMUDA

Probably the best-selling Bermuda Onion on the market, because of its exceptionally attractive appearance. It looks much like the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

YELLOW BERMUDA ONION

The 3 Most Popular Varieties for Shipping, Home Gardens and Canning

My Tomato plants, grown on new land from Certified seed, are certified by the State of Georgia. I grow each season four hundred acres of Tomato plants. They are grown in the open field and when shipped are 8 to 10 inches tall; they are field hardened, stocky, and well rooted. Each bundle of 100 is wrapped with paper to hold the damp moss to the roots. They are then packed in special crates or hampers and shipped by express, and will keep in good condition six to ten days. These plants are not frost-proof and should not be planted until danger of frost is over.

The fact that the seed is planted here in February and March gives the plants a chance to become acclimated and toughened by outside temperatures. When set farther North they will start growing quickly and produce rich, red, ripe Tomatoes three weeks before home-grown or hothouse plants. I ship these plants to every part of the United States, and have been shipping large quantities to market gardeners and truckers for thirty-six years. Van Camp Packing Co., of Indianapolis, Ind., uses ten million of my Tomato plants every season. Send me your order for some of these fine plants. You will be more than pleased with the early profitable crop they will produce.

GREATER BALTIMORE

is similar to Stone, heavily productive and very valuable for canning. The large, scarlet-red fruits commonly weigh 6 ounces; they are deep but flat, smooth, very firm and solid.

MARGLOBE

is a splendid type for earliness and uniformity. It is particularly valuable for shipping; definite disease-resistance recommends it for use in sections infested with fusarium wilt and nail-head rust. Plants thrifty and heavily productive, bearing over a long period. Fruits uniform deep scarlet, large, globe shaped; smooth, solid and of distinct quality.

RUTGERS

is highly recommended as a second-early variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

Fulwood's IMPROVED

PORTO RICO SWEET POTATO PLANTS

Southerners who know their yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who think of Sweet Potatoes as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder, keeping especially well. Northern markets and curing houses pay top prices for this variety.

Fulwood's NEW ROTENONE DUST

KILLS BY CONTACT AND STOMACH POISONING (NOT HARMFUL TO MAN)

INSECT CONTROL NOW MADE EASY BY NEW METHOD

Fulwood's New 1% Rotenone Dusting Powder is effective for the following pests: Cabbage Worm, Diamond Black Looper, Leaf Tyer, Cabbage Lice, Mexican Bean Beetle, Colorado Potato Beetle, Tomato Bug, Asparagus Beetle, Tomato Hornworm, Bean Leaf Hopper, Flea Beetle, Thrips, Celery Leaf Tyer, Gay Rose Bug, Web Worms, Plant Lice.

FULWOOD'S NEW ROTENONE DUST should be applied in dry weather. The plants, however, need not necessarily be dry, as its effectiveness is not lost on wet plants. The maximum kill is obtained in one to three days, according to weather conditions.

A good hand or power duster of the usual type is satisfactory for use.

For best results plants should be dusted as soon as pests appear. It is advantageous to dust at regular intervals about every seven days. Proper application and as complete coverage as possible helps in securing successful control of the pests. Both lower and

upper sides of the plant growth should be thoroughly dusted. The kind and age of the plants will determine the amount of dust required. The quantity will vary from 15 to 25 pounds per acre.

We guarantee the composition is accurately stated in the analysis on this package. There is no guaranty or warranty either expressed or implied as to results to be obtained from the use of these goods. Climatic and soil conditions and other factors beyond the seller's control necessarily affect results. The buyer agrees that the seller shall not be responsible or liable for injuries to crop, soil, person or property arising out of the use or handling of this material whether in accordance with directions or not.

Testimonials

Copy of letter sent by customer of ours in answer to an inquiry he received—

"I have your wire of even date asking for price on cabbage plants. I am not a grower of plants but have the plants grown in Georgia to supply our farmers in this section. For the past several years all the plants I have used have been grown by Mr. P. D. Fulwood, Tifton, Georgia and have proved satisfactory in every respect. I have used over three million plants grown by Mr. Fulwood this season. I have found that he uses the best seed obtainable, his outfit is large enough that he has power equipment for spraying and dusting and the crops produced from the plant furnished me have been true to name. I am forwarding your wire to him and I feel sure that any purchases made from him will be satisfactory. I am sorry that I am unable to furnish you plants and wish to thank you for wiring me."

—J. L. WARD, Rural Retreat, Va.

"I am writing you in regard to pepper and eggplant plants you sent me. They arrived in fine condition. I would like to compliment your workers for packing them in such fine shape. The plants were extra fine large ones and are looking fine. Thank you for your prompt service and the extra eggplants. Would you consider me as an agent for this territory? I believe I can sell 150 to 200 thousand plants here when my neighbors see mine. Thanking you again, I remain"

—W. W. WHITAKER, Wapato, Wash.

"Our plants came in by express May 3—they arrived here in very good condition, and since we had them all booked ahead to our customers, we have the entire lot cleaned up tonight—and we want to thank you for shipping us nice plants, and we were lucky to have them come thru in good order. There is nothing more disagreeable than to receive a lot of plants out of condition, because it's disappointing to us and the trade. So we feel you deserve a pat on the back, and here it is—Thank you again.

"If we don't have any bad weather this will clean up our plant sales for the season and if we need any more we will mail you the order. If we are here next year, you may look forward to our booking, and best of luck to you."

FREE PLANTS

In order to increase my mailing list I will include with your order 50 extra Cabbage plants free of charge, if you will write below the correct names and addresses of your friends or neighbors. Each name must be the head of a family that regularly buys plants. Please write carefully and plainly, giving full address. No free plants will be sent for incorrect and carelessly written lists. The list must be sent with an order for plants.

Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

"Your shipment of plants came to hand in 12 days from shipment and were in good condition. We brought them to life before transplanting and they seem to be doing well in spite of very bad weather. So far we have not seen any insect life on them and we thank you for the service. Hope we can arrange to use a great many more next season."

—H. HERMAN ARCHIBALD, Earbourn Grace, Newfoundland

"I received your order of Broccoli, Lettuce, Onions and Beet Plants in March and want to say that they have grown the finest vegetables I have ever raised and they are the talk of the neighborhood in which I live. I have given your address to many of my friends and next season it should mean many orders."

—CARL L. PETERS, 193 Buttermilk Rd., RR4, Covington, Ky.

SOME mail-order houses offer vegetable plants that they themselves do not grow. They merely get your order and send it on to some grower to fill, thus delaying the shipment.

We grow all the plants offered in our catalog, and growing plants is the only thing we do. We have been in this business for thirty-seven years; in fact, we are the oldest company growing nothing but vegetable plants in this country.

We have 2600 acres of fine land here at Tifton, Georgia, and Palatka, Florida, with graduate plant pathologists in charge of our growing stations. All of our Cabbage seed is grown for us by Ferry-Morse Seed Co. This gives our customers plants from the very best source.

Plants are sprayed every ten days with power sprayers and kept free from insects and disease. They are inspected and certified by the State of Georgia.

We have no hothouses; all of our plants are grown in the open field. When shipped, these hardy, well-rooted, field-grown specimens grow off immediately after being set and produce three weeks earlier than home-grown plants.

Stokely Bros. and Van Camp Packing Co. are among our thousands of satisfied customers. These large buyers have been ordering millions of plants from us for years. They know that our name stands for quality, and have found that our dependable plants produce better crops and are the cheapest in the long run.

"All the Tomato Plants I have ordered from you are doing fine. Please allow me to extend my thanks to you for your courtesy, promptness and efficiency."

—A. W. LAWSON, Box 162, Sussex, N. J.

"My order of 5000 Cabbage and 5000 Bermuda Onion plants arrived yesterday. They were the nicest I have ever bought. I buy your frost-proof Cabbage for early trade and raise my own for later planting so you see I have to have nice plants to sell. However, I don't see how anyone could find fault with the ones I received from you this year. They were very nice."

"Wishing you much success, I remain."

—IVAN BAKER, Crooksville, Ohio

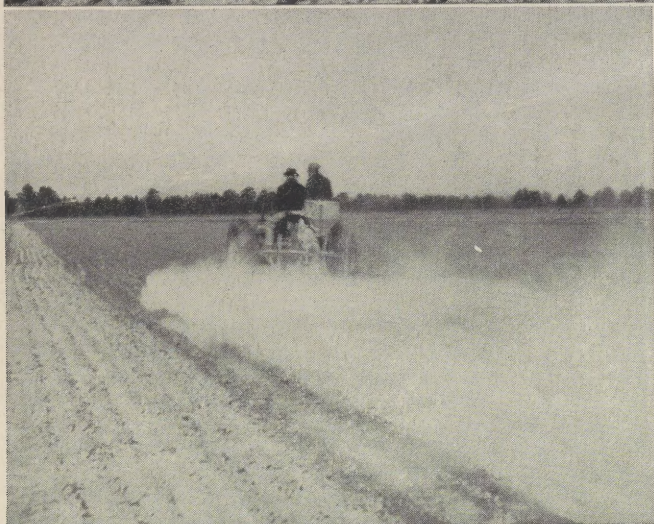

"I received the Peppers. Thank you. They were grand. Best plants we have been able to get for the past two or three years."

—MRS. A. L. SHORT, R. #2, Montrose, Colo.

TIFTON, GEORGIA

Guarantee

37 YEARS OF SATISFACTORY SERVICE

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled approximately 50 to bundle and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.

P. D. Fulwood
